

**Patient Name:** Jane Carp  
Date of Birth: Mar 12, 1982  
Age: 37y

Provider: Laura Brown  
Date: Sep 19, 2019

# Diagnosis and Treatment Plan

## Diagnosis

- Behaviour  Chief Concern  Clinical Findings  Dental History  Restorative  
 Extra Oral/ Intra Oral  Medical Relevance  Radiographic Findings

### General Concern

- Appearance  Health  Fear  Function  Pain

### Teeth Related Concern

- Crowding  Excess Space  Protruding  Missing Teeth  Other

### Gum Related Concern

- Bleeding  Gummy Smile  Overgrowth  Recession  Other

### Head and Neck Concern

- Ear Ringing  Head Aches  Jaw Related  Other

### Other Concern

### Patient Chief Concern Notes

### Clinical Findings

- Caries Risk Assessment  Dentition  Hygiene  Molar Relationship  Occlusion  
 Skeletal Evaluation  Soft Tissue Findings  TMJ Findings  Other

### Caries Risk Assessment

- Caries History  Demineralization  Hypoplasia  Orthodontic Appliances  
 Plaque and Gingivitis  Radiographic Findings

#### Caries History

- High Risk - Within 1 Year  Moderate Risk - Within 2 Years  
 Low Risk - None in 2 Years

#### Demineralization

- High Risk - 2+ Areas    Moderate Risk - 1 Area    Low Risk - None

*Hypoplasia*

- High Risk - Hypoplasia    Low Risk - No Hypoplasia

*Orthodontic Appliances*

- High Risk - Wearing Orthodontic Appliance  
 Low Risk - No Orthodontic Appliance

*Plaque and Gingivitis*

- High Risk - Visible Plaque on Anterior Teeth    Moderate Risk - Gingivitis  
 Low Risk - No Visible Plaque or Gingivitis

*Radiographic Findings*

- High Risk - Radiographic Enamel Caries  
 Low Risk - No Radiographic Enamel Caries

**Environmental Factors**

- Diet    Fluoride    Socio-Economic Status

*Diet Risk Factors*

- High Risk - Frequent Exposure of Simple Sugars Between Meals  
 Moderate Risk - Occasional Exposure of Simple Sugars Between Meals  
 Low Risk - Exposure of Simple Sugars Primarily at Meals

*Fluoride Exposure*

- High Risk - Suboptimal Topical Fluoride Exposure  
 Moderate Risk - Suboptimal Systemic Exposure with Optimal Topical Fluoride Exposure  
 Low Risk - Optimal Systemic and Topical Fluoride Exposure

*Socio-Economic Status*

- High Risk - Low SES (Eligible for Medicaid)    Low Risk - High SES  
 Moderate Risk - Middle SES (Eligible for School Lunch Program or SCHIP)

**Caries Risk**

- High    Moderate    Low

*Caries Risk Note*

**Dentition**

- Congenitally Missing    Spacing    Stage    Supernumerary

*Spacing*

- Crowding    Excess Space    Insufficient Space

*Crowding Notes*

[Redacted]

*Dentition Notes*

[Redacted]

**Oral Hygiene Findings**

- Plaque Score    Fluoride Status    Habits    Periodontal    Self-Care

*Plaque Score*

- A    B    C    D    E

*Fluoride Status*

- Adequate    Inadequate

*Brushing*

- 2+ Daily    Daily    3x / Week    Weekly    Monthly    Never  
 Other

*Flossing*

- 2+ Daily    Daily    3x / Week    Weekly    Monthly    Never  
 Other

*Other Self-Care Habits*

[Redacted]

**Classification**

- Primary (Terminal Plane)    Permanent Classification

*Class I*

- Bilateral    Left    Right

*Class II*

- Bilateral    Left    Right

*Class II Division II*

- Class II Division II

*Class III*

- Bilateral    Left    Right

*Class III Tendency*

- Bilateral    Left    Right

*Classification Notes*

[Redacted]

**Occlusal Findings**

- Arch Length    Bite    Jet    Midline Shift    Occlusal Plane

*Occlusal Notes*

**Skeletal Evaluation**

- Asymmetry    Prognathic Structures    Protrusive Structures  
 Retrognathic Structures    Vertical Development

*Skeletal Evaluation Notes*

**Soft Tissue Findings**

- Gingival    Frenum    Mucosa    Tongue Function    Other

*Gingival Findings*

- Disease    Over Growth    Recession

*Gingival Disease*

- Gingivitis    Periodontitis

*Gingivitis*

- Generalized    Localized

*Soft Tissue Disease Notes*

**TMJ Findings**

- Deviation    Joint Noise    Limited Movement    Locking    Pain Reported  
 Subluxation

*TMJ Findings Notes*

*Clinical Findings Notes*

**Historic Treatment**

- Extraction    Last Examination    Orthodontic    Surgery    Other

**History of Extraction**

wisdom teeth extracted in 2001. no complications

**Date of Last Dental Examination**

august 2018

**Last Radiographs**

- Bite Wings    Periapical    Other

*Bitewing Details*

august 2018

*Historic Treatment Notes*

**Extra-Oral**

- Head    Neck    Face    Lips    Hands

*Extra-Oral Notes*

**Intra-Oral**

- Airway    Buccal Mucosa    Frena    Palate and Oropharynx  
 Tongue and Floor of Mouth

*Airway Classification*

- I    II    III    IV

*Intra-Oral Notes*

**Restorative Note**

**Medical Relevance**

- Allergies    Antibiotic Premedication    Diabetes    Disability    Pregnancy  
 Trauma

**Allergies**

- Anaphylaxis    Dietary    Latex    Seasonal    Other

*Allergy Details*

penicillin

*Allergies Notes*

[Redacted]

*Medical Relevance Notes*

[Redacted]

**Radiographic Findings**

- Ectopic Eruption    Possible Impaction    Restorative Breakdown    Third Molars  
 TMJ

**Restorative Breakdown Notes**

[Redacted]

*Radiographic Finding Notes*

[Redacted]

## Treatment Plan

- Prevention    Prognosis    Re-Evaluation Required    Referral    Surgery  
 TMJ Therapy    Next Visit    No Treatment Indicated

**Preventative Recommendation**

[Redacted]

**General Prognosis**

- Excellent    Good    Fair    Poor    Terminal

**Localized Prognosis**

- Excellent    Good    Fair    Poor    Terminal

*Good Localized Prognosis*

[Redacted]

**Re-Evaluation**

- 1 Month    3 Months    6 Months    12 Months    18 Months    24 Months  
 Other

**Referral**

- ENT    Myofunctional Therapy    Oral Surgeon    Other

*Other Referral*

ortho consultation for crowding

*Referral Notes*

**Next Visit Date**

6 months

**Next Visit Treatment**

hygiene only
